Summary

AI & Data Science student with hands-on experience in Python, machine learning, and web development. Actively seeking opportunities as a Python Developer, Java Full Stack Developer, Machine Learning Engineer, or Software Developer to contribute, learn, and grow in a dynamic environment.

Education

P.E.S. Modern College of Engineering, Pune, Savitribai Phule Pune University <i>Bachelor of Engineering – Artificial Intelligence and Data Science</i>	Aug 2023 – Aug 2027 <i>Current CGPA: 9.13 / 10</i>
HSC – Maharashtra State Board <i>Percentage: 74.50%</i>	Mar 2023
SSC – Maharashtra State Board <i>Percentage: 93.00%</i>	Apr 2021

Skills

Programming Languages: Python, JavaScript, C++, SQL (MySQL), Java
Frameworks & Libraries: Spring Boot, JPA, Hibernate, React JS, REST API, Django, Flask, FastAPI, Pandas, NumPy, Scikit-learn, TensorFlow, Keras, BeautifulSoup, Selenium, Matplotlib, Seaborn
Databases: PostgreSQL, MySQL, H2B, MongoDB
Containers: Docker
Data & Analytics Tools: Microsoft Excel, Power BI
Tools & Platforms: Git, GitHub, VS Code, PyCharm, Dev-C++
Problem Solving: Data Structures & Algorithms (DSA)

Experience

Data Science Intern (Remote) <i>Oasis Infobyte</i> - Gained hands-on experience with Python-based data analysis and visualization using Scikit-learn, Matplotlib, and Seaborn. - Worked on real-world datasets and successfully completed three assigned data science tasks as part of the internship.	Jan 2025 – Feb 2025
Training & Internship Program – Skills4Future <i>Edunet Foundation</i> - Participated in a sustainability and environment-focused training and internship program. - Learned core concepts of Machine Learning, Deep Learning, Generative AI, and Agentic AI. - Collaborated on a group project to build an Electric Vehicle Decision Support System (EV-DSS) aimed at supporting user-centric EV decision making.	Dec 2025 – Jan 2026

Projects

News Whisper – Multilingual AI News Delivery Engine (Open Source, Team Project) <i>Python, Groq Llama 3.3, Edge-TTS, Sarvam AI, BeautifulSoup4, Cloudflare D1</i> - Built the Marathi TTS pipeline for an open-source news app that scrapes, summarizes, and narrates Indian news in English, Hindi, and Marathi. - Implemented Devanagari-ratio-based language detection and tuned Groq Llama 3.3 70B prompts for spoken-style Marathi summaries. - Integrated dual TTS engines (Edge TTS, Sarvam AI bulbul:v3) with automatic failover for natural Indic narration. - Role: TTS/NLP Engineer – Marathi language pipeline (detection, summarization prompts, speech synthesis).
EV-DSS (Electric Vehicle Decision Support System) – Multi-State City Analysis (Group Project, Internship) <i>Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn</i> - Built a user-oriented decision support system to help potential EV buyers identify cities with favorable economic and environmental conditions for adoption. - Collected and merged datasets from multiple Indian states, performed in-depth exploratory data analysis, and applied PCA for dimensionality reduction. - Implemented K-Means clustering to derive Economic and Environmental Index scores for each city, enabling data-driven EV decision support. - Role: Data Scientist / Data Analyst – data collection, preprocessing, EDA, PCA, clustering, and index computation.

Aegis AI Project Manager – Full Stack AI Project Management System (Personal Project)

Django, PostgreSQL, Render, Groq Llama 3, PlantUML API

- Developed a full-stack AI-driven project management system using Django, PostgreSQL, and Render.
- Integrated Groq Llama 3 agents for intelligent goal breakdown, risk assessments, and scheduling.
- Built interactive tools including AI task scaffolding, PDF reporting, and a contextual chat assistant.
- Implemented real-time automated generation of system architecture diagrams using the PlantUML API.

Certifications & Badges

- **Python for Data Science** – NPTEL (Jan 2025 – Feb 2025)
- **Generative AI Mastermind** – OutSkill (Sep 2025)
- **100 Days of Code: The Complete Python Pro Bootcamp** – Udemy (Sep 2025)
- **AI and Green Skills** – Edunet Foundation (Dec 2025)
