SUMMARY

I am Yuvraj Mangutkar, a passionate AI & Data Science student with hands-on experience in Python, machine learning, and web development. I am actively seeking opportunities as a Python Developer, Machine Learning Engineer, or Software Developer where I can contribute, learn, and grow in a dynamic environment.

EDUCATION

Bachelor of Engineering-Artificial Intelligence and Data Science
P.E.S. Modern College of Engineering, Pune
Savitribai Phule Pune University
Current CGPA: 9.13 / 10

Aug 2023- Aug 2027

HSC-Maharashtra State Board
Percentage: 74.50%

Mar 2023

SSC-Maharashtra State Board
Percentage: 93.00%

Apr 2021

SKILLS

- **Programming Languages:** Python, JavaScript, C++, SQL (MySQL).
- **Frameworks & Libraries:** Django, Flask, FastAPI, Pandas, NumPy, Scikit-learn, TensorFlow, Keras, BeautifulSoup, Selenium, Matplotlib, Seaborn.
- **Databases:** PostgreSQL, MySQL, MongoDB.
- **Containers:** Docker.
- **Data & Analytics Tools:** Microsoft Excel, Power BI.
- **Tools & Platforms:** Git, GitHub, VS Code, PyCharm, Dev-C++.
- **Problem Solving:** Data Structures & Algorithms (DSA).

GitHub
LeetCode

EXPERIENCE

1.Data Science Intern (Remote) | Oasis Infobyte | Jan 2025 – Feb 2025

Gained hands-on experience with Python-based data analysis and visualization using Scikit-learn, Matplotlib, and Seaborn. Worked on real-world datasets and successfully completed three assigned data science tasks as part of the internship.

2.Training & Internship Program | Skills4Future (Edunet Foundation) | Dec 2025 – Jan 2026

Participated in a sustainability and environment-focused training and internship program. Learned core concepts of Machine Learning, Deep Learning, Generative AI, and Agentic AI, and collaborated on a group project to build an Electric Vehicle Decision Support System (EV-DSS) aimed at supporting user-centric EV decision making.

PROJECTS

1.House Price Prediction Tool – Bengaluru (*Group Project, Jan 2025 – Mar 2025*) – Developed a web-based app to predict house prices using Bengaluru housing data. Applied multiple ML algorithms (Linear Regression, Lasso, Ridge, Decision Tree, Random Forest); selected Random Forest for highest accuracy using ensemble bagging.

Role: Built the ML model and integrated it with Flask for a user-friendly interface.

Tech Stack: Python, Pandas, NumPy, Matplotlib, Scikit-learn, Flask.

2.EV-DSS (Electric Vehicle Decision Support System) for EV Buyers – Multi-State City Analysis (Group Project, Internship) – Built a user-oriented decision support system to help potential electric vehicle buyers identify cities with favorable economic and environmental conditions for EV adoption. Collected and merged datasets from multiple Indian states, performed in-depth exploratory data analysis, and applied PCA for dimensionality reduction. Implemented K-Means clustering to derive Economic and Environmental Index scores for each city, enabling data-driven and user-friendly EV decision support.

Role: Data Scientist / Data Analyst – responsible for data collection, preprocessing, EDA, PCA, clustering, and index computation.

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn.

3.Aegis Ai Project Manager | Full Stack Ai Project Management System(Personal Project)-Developed a full-stack AI-driven project management system using Django, PostgreSQL, and Render. Integrated Groq Llama 3 agents for intelligent goal breakdown, risk assessments, and scheduling. Built interactive tools including AI task scaffolding, PDF reporting, and a contextual Chat Assistant. Implemented real-time automated generation of system architecture diagrams using the PlantUML API.

CERTIFICATION & BADGES

Python for Data Science – NPTEL (*Jan 2025 – Feb 2025*)

Generative Ai Mastermind-OUTSKILLS (*Sep 2025*)

100 Days of Code: The Complete Python Pro Bootcamp-UDEMY (*Sep 2025*)

Ai and Green Skills-EDUNET FOUNDATION (*Dec 2025*)

50 Days Badge-LEETCODE (*2025*)
