SUMMARY

Full Stack and AI Engineer with hands-on experience designing REST-based backend systems (Java Spring Boot, Django, FastAPI) and building applied Generative AI products powered by LLMs, LangChain, Hugging Face, and vector databases. Comfortable owning a feature end-to-end — from data pipelines and model integration to API design and UI — with a track record of shipping multilingual NLP pipelines and AI-driven full-stack applications. Seeking a Full Stack Developer or AI Engineer role to build production-grade, AI-powered software in a fast-moving engineering team.

EDUCATION

P.E.S. Modern College of Engineering, Pune, Savitribai Phule Pune University Aug 2023 – Aug 2027
Bachelor of Engineering – Artificial Intelligence and Data Science | Current CGPA: 9.13 / 10

HSC – Maharashtra State Board Mar 2023
Percentage: 74.50%

SSC – Maharashtra State Board Apr 2021
Percentage: 93.00%

SKILLS

Languages: Python, JavaScript, C++, Java, SQL
AI / Generative AI & NLP: NLP, Transformers, LLMs, Prompt Engineering, LangChain, Hugging Face, Vector Databases (Pinecone), RAG, Speech Recognition, GPT / Llama / Gemini / Claude APIs
Frameworks: Spring Boot, JPA, Hibernate, React JS, REST API, Django, Flask, FastAPI
ML & Data: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, Matplotlib, Seaborn, BeautifulSoup, Selenium
Databases: PostgreSQL, MySQL, H2, MongoDB
Tools & Platforms: Docker, Git, GitHub, VS Code, PyCharm, Power BI, Excel

EXPERIENCE

Data Science Intern (Remote) — Oasis Infobyte Jan 2025 – Feb 2025
Gained hands-on experience with Python-based data analysis and visualization using Scikit-learn, Matplotlib, and Seaborn; completed three real-world data science tasks as part of the internship.

Training & Internship Program – Skills4Future — Edunet Foundation Dec 2025 – Jan 2026
Completed a sustainability-focused training program covering Machine Learning, Deep Learning, Generative AI, and Agentic AI; collaborated on a group project to build an Electric Vehicle Decision Support System (EV-DSS) for user-centric EV decision making.

PROJECTS

CAP Advisor – MHT-CET Preference List Generator [Live Demo →](#)
React, Tailwind CSS, FastAPI, Selenium (Web Scraping), Render, Vercel
Built a full-stack web app that helps MHT-CET candidates generate a data-driven college and branch preference list for CAP counselling. Built a Selenium scraper to collect historical cutoff data, exposed it via a FastAPI backend, and built a React + Tailwind frontend so students can filter by rank/percentile, branch, and category to auto-generate an optimized preference order.

Aegis AI Project Manager – Full Stack AI Project Management System [Live Demo →](#)
Django, PostgreSQL, Render, Groq Llama 3, PlantUML API
Developed a full-stack AI-driven project management system using Django, PostgreSQL, and Render, integrating Groq Llama 3 agents for intelligent goal breakdown, risk assessment, and scheduling. Built interactive tools including AI task scaffolding, PDF reporting, and a contextual chat assistant, along with real-time automated generation of system architecture diagrams via the PlantUML API.

News Whisper – Multilingual AI News Delivery Engine [Live Demo →](#)
Python, Groq Llama 3.3, Edge-TTS, Sarvam AI, BeautifulSoup4, Cloudflare D1
Built the Marathi TTS pipeline for an open-source news app that scrapes, summarizes, and narrates Indian news in English, Hindi, and Marathi, implementing Devanagari-ratio-based language detection and tuning Groq Llama 3.3 70B prompts for spoken-style summaries. Integrated dual TTS engines (Edge TTS, Sarvam AI bulbul.v3) with automatic failover. Role: TTS/NLP Engineer, owning the Marathi pipeline end-to-end.

EV-DSS (Electric Vehicle Decision Support System) – Multi-State City Analysis [Live Demo →](#)
Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Built a user-oriented decision support system to help EV buyers identify cities with favorable economic and environmental conditions, collecting and merging datasets from multiple Indian states and applying PCA for dimensionality reduction. Implemented K-Means clustering to derive Economic and Environmental Index scores per city. Role: Data Scientist / Data Analyst, covering data collection, preprocessing, EDA, PCA, clustering, and index computation.

CERTIFICATIONS & BADGES

The AI Engineer Course 2026: Complete AI Engineer Bootcamp – Udemy (365 Careers)
Python for Data Science – NPTEL
Generative AI Mastermind – OutSkill
100 Days of Code: The Complete Python Pro Bootcamp – Udemy
AI and Green Skills – Edunet Foundation
